

Using AI to Draft a Weekly Work Update Email

1. Target Task – المهمة المستهدفة

Every week, I need to write a short email summarizing completed tasks, current tasks, and next steps. Writing and organizing this email manually takes approximately 15 minutes.

2. Structured Prompt – R.A.C.E.

Role:

Act as a professional workplace communication assistant.

Action:

Draft a short weekly work update email.

Context:

Use the following sanitized information:

Completed: Updated the weekly report.

In progress: Reviewing project documents.

Next step: Prepare the presentation for next week.

No confidential or personal information is included.

Expectation:

Write a professional and clear email in English. Keep it under 120 words. Use three bullet points for Completed, In Progress, and Next Step, followed by a polite closing.

Example AI Output:

Subject: Weekly Work Update

Hello Team,

Please find below my weekly work update:

Completed: Updated the weekly report.

In Progress: Reviewing project documents.

Next Step: Preparing the presentation for next week.

Please let me know if any additional information is required.

Best regards.

3. Iterative Refinement — التحسين

بعد ما أعطاني AI المسودة الأولى، أستخدم Follow-up Prompt محدد، وليس إعادة الطلب من البداية:

Make the email more concise and friendly while keeping a professional tone. Keep the three bullet points, but shorten the introduction and closing.

Refined Output:

Subject: Weekly Work Update

Hello Team,

Here is my weekly update:

Completed: Updated the weekly report.

In Progress: Reviewing project documents.

Next Step: Preparing next week's presentation.

Thank you, and please let me know if you have any questions.

Best regards.

4. Data Masking — إخفاء البيانات

قبل إدخال المعلومات إلى AI، أ حذف أي معلومات شخصية أو سرية.
مثلاً بدل:

Ahmed Al-XXX completed the report for Customer XXX, Account ID 123456.

أستخدم:

[Employee] completed the report for [Customer].

وبالتالي لا أضع أسماء، أرقام هوية، أرقام حسابات، بيانات عملاء، كلمات مرور، أو معلومات سرية خاصة بالجهة في الأداة.

5. Verification & Impact — التحقق والأثر

راجعت الناتج قبل استخدامه وتأكدت من:

أن المهام المذكورة صحيحة.

لا توجد أسماء أو بيانات سرية.

لا توجد أرقام أو حسابات تحتاج إلى تصحيح.

اللغة والنبرة مناسبة للإيميل.

راجعت كل سطر قبل الإرسال.

Time Impact:

Before AI: approximately 15 minutes.

With AI: approximately 5 minutes.

Estimated saving: 10 minutes per week (about 67%).
